ON

“Awareness on Eye Operations for Elderly People”

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

(ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING)

Under the guidance of:

Submitted by
A.venkata lokesh

Sri Venkateswara college of Engineering, Tirupathi

✓ INTRODUCTION

- ❑ The project is about giving awareness on eye operations for old-age people.
- ❑ Many elderly people have eye problems but are scared to go for surgery.
- ❑ Awareness was created through visits and direct talks with elderly people.
- ❑ The project builds confidence and awareness among elderly people.
- ❑ The goal is to explain that eye operations are safe, simple, and helpful.

✓ PROJECT AIM

- ❑ To create awareness about eye operations for elderly people.
- ❑ To explain that eye surgeries like cataract are safe and helpful.
- ❑ To motivate old-age people to get eye checkups and treatment.
- ❑ To reduce fear and misconceptions about eye operations.
- ❑ To help prevent avoidable blindness in the community.
- ❑ To inform people about free or low-cost eye surgery options.
- ❑ To improve the quality of life of elderly individuals through better eyesight

✓ WHY THIS PROJECT ?

- ❑ Many elderly people suffer from poor eyesight but do not go for treatment.
- ❑ They are scared of eye operations due to lack of correct information.
- ❑ Many families are unaware that eye surgeries are free or low cost.
- ❑ Poor eyesight makes elders dependent on others for daily activities.
- ❑ This project helps reduce fear and misunderstandings in the community.
- ❑ It improves the overall health and quality of life in the community.

- Targeted households where **elders had vision problems**.

✓ TARGET AREAS

- ❑ The project was conducted in **Tadipatri town**.
- ❑ Focus was mainly on **elderly people living in local communities**.
- ❑ Areas with **low awareness about eye health** were given priority.
- ❑ Targeted households where **elders had vision problems**.
- ❑ Visited neighborhoods where **financial issues prevent treatment**.
- ❑ Focused on places where **old-age people fear eye operations**.

✓ PROJECT PLANNING

- ❑ Planned to clear doubts and fears through face-to-face interactions.
- ❑ Planned to motivate families to support their elders for treatment.
- ❑ Prepared simple explanations about cataract and eye surgeries.
- ❑ Scheduled weekly visits for one month to cover more households.
- ❑ Planned to create awareness about eye operations for elderly people.

✓ IMPLEMENTATION PROCESS

- ❑ Met elderly people and asked about their eye problems.
- ❑ Explained in simple words how cataract and other eye surgeries work.
- ❑ Motivated elders to attend eye checkups at nearby hospitals.
- ❑ Recorded responses, problems, and suggestions from the community.
- ❑ Cleared their doubts and removed fear about the operation process.
- ❑ Followed up with the people who were willing for surgery.

• Some families accompanied their elders to eye camps or hospitals.

✓ COMMUNITY PARTICIPATION

- ❑ Local families actively listened and discussed their doubts.
- ❑ Some community members helped identify others who needed awareness.
- ❑ Families showed interest in getting information about free treatments.
- ❑ Community elders participated well during awareness discussions.
- ❑ Some families accompanied their elders to eye camps or hospitals.

✓ AWARENESS CAMPAIGN

- ❑ Explained the importance of eye checkups for elderly people.
- ❑ Informed the community about free and low-cost eye treatment options.
- ❑ Met people individually to give personalized guidance.
- ❑ Motivated old-age people to overcome fear and go for treatment.
- ❑ Shared real examples of successful eye operations to build confidence.

✓ OBSERVATIONS

- ❑ Most of them were scared of eye operations due to lack of awareness.
- ❑ Fear reduced when they understood the safety of modern operations.
- ❑ Good participation was seen in awareness discussions.
- ❑ The community showed interest in continuing such health programs.
- ❑ Elders felt more confident after receiving proper explanation.

✓ IMPACT OF THE PROJECT

- ❑ Fear and misconceptions about eye operations were reduced.
- ❑ The community learned about free and low-cost treatment options.
- ❑ The community learned about free and low-cost treatment options.
- ❑ The project helped reduce avoidable blindness through early action.

✓ CONCLUSION

- ❑ The project successfully created awareness about eye operations for elderly people.
- ❑ Many elders gained correct information about cataract and eye treatments.
- ❑ The project strengthened the connection between health awareness and community support.
- ❑ Overall, the initiative helped improve confidence and better eye health in the community.

THANK YOU
